Kindermusik is the premier music readiness program for the young child. It makes music a joyful and natural part of your child's life with the emphasis on singing, rhythm activities and movement. Music encourages early learning and creativity in your child. Because so much of your child's cognitive, sensory, and physical development occurs by age 7, Kindermusik includes a three-stage curriculum that complements your child's own timetable for learning.

Kindermusik brings the joy of music and movement to the lives of children, allowing them to explore their world through music. Joyful participation in music is a natural part of a child's life. Young children have a natural desire to move and be active and to spontaneously sing and dance. Early musical experiences can nurture a child's freedom of self expression, stimulate imagination, promote self esteem and foster a delight in learning.
